Professional Summary

Junior DevOps Engineer and Computer Science graduate with an AWS Certified Solutions Architect -Associate with hands-on experience in AWS, Docker, CI/CD pipelines (GitHub Actions, Jenkins), Linux administration, and containerized application deployment. Additional experience in Python automation, SIEM monitoring (Wazuh), intrusion detection, and security incident analysis.

Technical Skills

Cloud & DevOps: AWS (EC2, ECS Fargate, ECR, IAM, ALB, S3, RDS, VPC, Auto Scaling), AWS CLI, Docker, Docker Compose, Jenkins, GitHub Actions, CI/CD, Terraform, Ansible, AWS CloudFormation, Infrastructure as Code, Linux, Git, GitHub, Shell Scripting

Web & Infrastructure: Nginx, Apache HTTP Server, IIS, Reverse Proxy, HTTPS, Application Deployment, Health Checks

Development: Python, C, C#, .NET 10, ASP.NET Core, REST APIs, FastAPI, Django, Entity Framework Core, SQL Server, MySQL

Security & Monitoring: Wazuh, Snort IDS, Cowrie Honeypot, Nmap, Wireshark, Log Analysis, Network Traffic Analysis, Incident Detection, Threat Intelligence, Endpoint Security

Work Experience

DevOps Trainee **Jul 2026 – Present**
Chetu India Pvt. Ltd., Noida, India

- Configured Nginx and Apache web servers for website hosting, reverse proxy routing, and HTTPS setup on Linux.
- Built CI/CD pipelines with GitHub Actions and Jenkins to automate builds, application deployments, and releases.
- Deployed containerized applications with Docker, managed code with Git and GitHub, and worked with AWS resources (EC2, IAM, VPC, storage, databases) while troubleshooting deployment and server issues.

System & Software Security Intern **Jan 2026 – Mar 2026**
NIELIT, Government of India (MeitY), Gorakhpur, India

- Deployed Cowrie honeypots and Snort IDS to capture suspicious activity, analyze network traffic, and support early-stage threat detection.
- Built a containerized mini-SOC with Wazuh and Docker for log correlation, security alerting, and incident response workflows.
- Automated network discovery, vulnerability assessment, and unauthorized-device detection using Nmap and Python watchdog scripts.

Technical Projects

CivicDesk – AWS CI/CD Deployment **.NET 10, ASP.NET Core, Docker, GitHub Actions, AWS**

- Containerized an ASP.NET Core REST API with Docker and deployed it on Amazon ECS Fargate behind an Application Load Balancer.
- Automated CI/CD with GitHub Actions to build Docker images, push them to Amazon ECR, and deploy updated ECS task definitions.
- Integrated GitHub OIDC with AWS IAM for keyless authentication, eliminating long-lived AWS access keys from the deployment workflow.
- Configured ECS health checks and target-group routing; verified the production deployment through the public load balancer with Swagger/OpenAPI and HTTP 200 responses.

Cyber Sentinel C2 – Endpoint Monitoring and Remote Response System **Python, FastAPI, Flutter, OpenCV**

- Engineered an endpoint monitoring solution to detect unauthorized USB insertion and failed Windows login attempts (Event ID 4625) using Windows Event Logs and WMI, with an OpenCV-based forensic image capture module linked to structured incident records.
- Built a FastAPI backend (HTTPS, REST APIs, incident logging, data sync) and a Flutter dashboard for real-time security alerts and incident history.

Engage AI – AI-Powered Data Analysis Chatbot **Django, Python, Pandas, Ollama, RAG**

- Developed a Django web application for natural-language analysis of CSV and Excel datasets, using Ollama-hosted LLMs locally so no dataset content is sent to an external LLM API.
- Implemented a Retrieval-Augmented Generation (RAG) workflow with Pandas to supply dataset context to the model, enabling summaries, filtering, aggregations, and trend analysis.

Certifications

AWS Certified Solutions Architect – Associate (Amazon Web Services) **Issued Oct 2026 – Expires Oct 2029**

Education

Bachelor of Technology in Computer Science, Raj Kumar Goel Institute of Technology **Sep 2022 – Jul 2026**
