PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in cybersecurity and backend systems, with experience building real-time, production-grade solutions such as an endpoint intrusion detection and response system (Cyber Sentinel) and AI-driven automation tools using LLMs and prompt engineering. Strong in Python, FastAPI, and distributed architectures, with a focus on scalable system design, security engineering, and high-performance applications. Seeking backend or security-focused roles in product-driven environments.

EDUCATION

Raj Kumar Goel Institute of Technology

Bachelor of Technology in Computer Science; CGPA: 7.1/10

Ghaziabad, India

Sep 2022 – Jul 2026

TECHNICAL SKILLS

Programming Languages: Python (Advanced), SQL (MySQL), JavaScript, C, HTML5/CSS3

Cybersecurity: Wazuh SIEM, Snort IDS, Cowrie Honeygot, Nmap, Wireshark, Kali Linux, Endpoint Detection & Response (EDR), Incident Response, Threat Intelligence, Vulnerability Assessment, Log Analysis, OSINT

AI & Automation: Prompt Engineering, AI Workflow Design, Engage AI Systems, Data Automation, Process Automation

Computer Vision: OpenCV, Real-time Image Capture, Event-driven Surveillance Systems

Mobile & Frontend: Flutter, UI/UX Design, Responsive Interfaces, Figma (Advanced), Canva, Adobe Creative Suite

Operating Systems: Linux (Kali, Ubuntu), Windows

Core Competencies: System Design, Real-time Event Processing, Security Monitoring, Threat Detection, API-based Architecture, Problem Solving

EXPERIENCE

System & Software Security Intern

Jan 2026 – Mar 2026

NIELIT, Government of India (MEITY)

Onsite

- Spearheaded deployment of **Cowrie Honeygot** and **Snort IDS** for real-time threat intelligence, traffic analysis, and early-stage **incident detection**.
- Orchestrated a miniature **SOC environment** using **Wazuh** and **Docker** to automate log correlation, alerting, and **incident response** workflows.
- Automated **network reconnaissance** and **vulnerability assessment** tasks using **Nmap** and Python-based watchdog scripts for unauthorized device detection.

Visual Designer Intern

Aug 2025 – Sep 2025

InAmigos Foundation (IAF)

Remote

- Developed **15+ high-fidelity** visual assets and marketing campaigns, driving a **25% boost** in social media engagement.
- Transformed brand identity through advanced **UI/UX principles** and user-centric graphic design using Figma.

Python Developer Intern

Jun 2025 – Jul 2025

Coding Samurai

Remote

- Engineered high-performance Python scripts for data automation, achieving a **40% improvement** in workflow efficiency across internal toolsets.
- Implemented robust error-handling and modular code architectures to ensure scalability and long-term maintainability.

TECHNICAL PROJECTS

AI-Powered Data Analysis Chatbot (Engage AI) | Django, Python, Pandas, Ollama (Local LLM)

- Designed and developed a full-stack web application enabling users to upload CSV/Excel datasets and interact with them using a natural language AI chatbot.
- Integrated a locally hosted Large Language Model (LLM) using Ollama to provide secure, offline, and real-time conversational data analysis.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline where dataset context is dynamically processed using Pandas and injected into the LLM for accurate query responses.

- Developed intelligent query handling to answer analytical questions such as data summaries, trends, aggregations, and insights directly from uploaded datasets.
- Enabled support for structured data processing including statistical summaries, filtering, and transformation using Python-based data pipelines.

Cyber Sentinel C2: Cloud-Based Endpoint Monitoring and Remote Response System

- Designed and developed a full-stack cybersecurity system for real-time endpoint monitoring, intrusion detection, and remote response using Python, FastAPI, and Flutter.
- Implemented a persistent endpoint agent with SYSTEM-level privileges capable of detecting suspicious activities such as unauthorized USB device insertion and failed login attempts using Windows Event Logs (Event ID 4625) and WMI monitoring.
- Developed an automated forensic capture module using OpenCV to record intruder images, along with network attribution (public IP) and geolocation data, generating structured incident payloads.
- Built a cloud-based backend using FastAPI to handle secure HTTPS communication, incident logging, and REST API endpoints for real-time data synchronization and command handling.
- Engineered a mobile monitoring dashboard using Flutter, providing real-time alert visualization, incident history tracking, and an interactive UI for security event analysis.

SOC Threat Monitoring & SIEM Integration | Wazuh, Cowrie, JSON, Docker 2026

- Implemented a unified **SIEM dashboard** to correlate events from Cowrie Honeypots, tracking **100+ SSH brute-force attempts** and generating actionable threat intelligence.
- Automated **alert generation** and **incident response** triggers for wget-based malware delivery and suspicious command execution patterns.

Network Forensics & DoS Analysis | Wireshark, TCP/IP, Forensics 2026

- Performed packet-level **network forensics** on **TCP SYN Flood attacks** to correlate network latency with server resource exhaustion.
- Utilized **Wireshark** for deep-packet inspection, identifying and documenting protocol-level vulnerabilities in ICMP and HTTP traffic.

Weather Intelligence App | Python, REST APIs, JSON Parsing 2025

- Integrated real-time weather APIs to build a robust data visualization tool with high-accuracy JSON response parsing and error handling.

Lyrics Extractor Utility | Python, Web Scraping, NLP 2025

- Engineered a Python scraping tool with advanced request-handling and rate-limit management to extract large-scale text data for NLP processing.
- Applied **Natural Language Processing** techniques including text normalization and data cleaning to improve downstream model accuracy.

ADVANCED VISUAL DESIGN PROJECTS

Portfolio UX Ecosystem | Figma, HTML, CSS, JS 2025

- Designed and prototyped a high-fidelity personal portfolio achieving a **95+ Google Lighthouse** performance score.
- Implemented responsive grid systems and modern CSS animations to ensure cross-platform visual consistency.

Social Media Branding Campaign | Visual Narrative, Canva, UI Design 2025

- Created a cohesive visual narrative for departmental events applying advanced typography and color theory principles.

CERTIFICATIONS

Microsoft Certified Power BI Data Analyst Associate – Microsoft (2025)

Data Analytics Job Simulation – Deloitte Forage (2025)

Python for Data Science – Coursera/Google (2024)

ACHIEVEMENTS & ACTIVITIES

TATA Crucible Campus Quiz 2025 – Certificate of Participation

HackerRank Python Certification – Demonstrated proficiency in Python programming

IEEE NGISE – Poster Designed and Presented at AKGEC Ghaziabad

Poster Designing – Poster Designed for Departmental Events
